

2010 Gravel Application

The following chart contains the roads identified for maintenance gravel application for 2010. The project is scheduled to start Monday April 26, 2010 and should be completed by the end of May 2010.

There may be temporary delays and for a short period of time dusty conditions during the application process. After the initial application of gravel the road may become rough. This is normal and expected. Grading will be done shortly after and dust suppressant will be applied after the second or "final" grade.

Staff thank you in advance for your patience and understanding and apologize for any inconvenience you may experience.

Road Name	From	To	Approx. Km
Eason Line	Heritage Line	Hwy. # 7	3.7
